Electronic repairer  
Model maker  
Occasional baker  
Motorsport lover  
Cactus grower  
Hardware designer  
Code tinkerer

A motivated software developer with a passion for technology, proven problem solving skills and a strong desire to improve. With a track record of driving innovation and a keen eye for detail, I am an ideal candidate for a software developer role.

## Skills:

### Team Player

I am able to work effectively in a team, providing support for other teams members and working towards a cohesive working environment. This is evidenced by my progression to a senior team member in my previous employment, as well as my award-winning University group project.

### An Eye for Detail

In my role as a Senior Data Analyst, being able to spot issues and respond effectively was key. My eye for detail helped push the department forward, with an increase in data meeting the highest quality standards almost tripling in my time in this role, despite requirements becoming stricter over this time period.

### Logical Thinker

Years of working with data, suggesting process improvements and working to integrate company systems demonstrates my skills as a logical thinker.

## Education:

### University of Warwick, Coventry: 2013-2016

- Bachelor of Science with Honours – Computer Science
- Award winning software engineering project, created for Deutsche Bank.
- Earned a scholarship from the University

### **Sandwell Academy, West Bromwich: 2006-2013**

- 4x A Levels
- 17 A\*-B grade GCSEs, including A\* in Maths, Sciences, English and IT
- Won several awards for academic achievement

### **Employment:**

#### **Hayley Group Limited, Halesowen - Senior Data Analyst /Developer: 2018-2021**

- Responsible for creating and maintaining SQL queries to interact with product data and maintaining data integrity
- Liaising with the IT department on the requirements of the Data Team, providing direction on the development of back-end infrastructure
- Assisting with the design, development strategy and testing of the company Smartshop platform and various B2C platforms
- Creating documentation through the internal wiki system, to support colleagues
- Providing solutions to ease the integration of ERP/Master Data/B2B/B2C systems

#### **Hayley Group Limited, Halesowen – Data Support: 2017-2018**

- Responsible for maintaining and improving the quality of data held in the company's ERP/master data systems
- Handling data support queries from across the group
- Highlighting issues and suggesting process improvements
